

2015-2016

Distinguished Lecture Series

Camillo De Lellis

Professor of Mathematics
University of Zurich

Public Lecture

The h-principle and a conjecture of Onsager in fluid dynamics

Thursday, March 3, 2016

4:00-5:00pm

Natural Sciences II, Room 2201

Mathematics Colloquium

Singularities of area minimizing surfaces

Friday, March 4, 2016

4:00-5:00pm

RH 306

Professor Camillo De Lellis is Professor of Mathematics at the University of Zurich. He has done pioneering work in partial differential equations, geometric measure theory, and fluid dynamics.

The honors Professor De Lellis has received include the Stampacchia medal (2009), the Fermat Prize (2013), and the Caccioppoli Prize (2014). He was an invited speaker at the ICM in Hyderabad in 2010 and plenary speaker at the European Congress of Mathematics in 2012.
