- Matt explains complex material in a straightforward and intuitive way. I usually skip discussion sections, but I have attended every one of his sections because his explanations really help me understand the class material. I wish more of my professors were as good at lecturing as Matt.
- Very clear with discussions and instructs students well in explaining how to solve particular math problems and is able to come up with good examples that are very relevant to lecture material. Also does a very good job preparing student for quizzes

- N/A, he was great!
- nothing that I can think of
- Work on your mental math (just kidding!). If you had a more organized way of returning quizzes/midterms back during discussion, it would give you some extra time to teach! Plus, it's always a scramble in the beginning of class.
